INSTRUCTIONS FOR FILLING AN EARPOPPER™ PRESCRIPTION

The EarPopper is a new medical device for treating middle ear problems. Similar to antibiotics and asthma inhalers, it requires a prescription from a healthcare provider and needs to be filled through the pharmacy. Since this is a new device, it is probably not currently stocked in your pharmacy and will need to be ordered.

Steps to filling a customer's EarPopper prescription:

1. Check your pharmacy computer system by typing in the word EARPOPPER (or it may be listed as two words EAR POPPER). Your corporate office may already have the National Drug Code (08564 000000) set up in your system.
2. If you don't find the EARPOPPER listed in your computer system, then check with your medical supplier. The following medical suppliers have the EARPOPPER stocked and available for next day delivery:

McKesson

Item Number: 1777259 EARPOPPER

AmerisourceBergen

Item Number: 762-551 EARPOPPER

Cardinal

Item Number: 4081691 EARPOPPER

3. If you do not use these suppliers, you may order the device directly from the manufacturer. Contact Micromedics' Customer Service at 1-800-624-5662.
